

Requirements Traceability Matrix: It is a process of tracking every step across entire project lifecycle.

How to use AI on making traceability matrix: If we are very new to the project, can ask AI to write a traceability matrix model to at least get the starting point.

Process Modeling: Process modelling is the discipline of creating visual, structured representations of how work gets done inside an organization.

How to use AI on making Process Diagram

BPMN standards

Context Diagram: A context diagram is a high-level visual model that shows a system as a single box and illustrates how it interacts with external entities such as users, departments, other systems, or data sources.
